

ASSINGMENT -2

Assingment date	19 SEPTEMBER 2022
Student name	HARI HARA RAJA SUDHAN .R
Student roll no	AC19UIT014

- 1.Create user table with user with email,username,password,roll no
2. perform update ,delete queries with user table
- 3.connect python code to database2
- 4.create a flask app with registration page,login page ,and welcome page.by default load the registration page once the user enters all the fields store the data in database and navigate to login page authenticate user username amnd password.if the user is valid show the welcome page

- 1.Create user table with user with email, username, roll number password

```
CREATE TABLE user (  
    roll_number int,  
    username varchar(300),  
    email varchar(300),  
    password varchar(300)  
);
```

roll_number	username	email	password
empty			

Show all X

2. Perform UPDATE, DELETE Queries with user table

INSERT Statement:

INSERT INTO user

(roll_number, username ,email, password) VALUES

(1, 'sunanth', ' sunanth@gmail.com','sunanth15'),

(2, 'harish', ' harish@gmail.com','harish123'),

(3, 'hariharan', 'hariharn@gmail.com', hari123'),

(4, 'hariharan raja sudhan', 'hari@gmail.com', hari0123');

The screenshot shows a mobile application interface with a table titled "User". The table has four columns: roll_number, username, email, and password (labeled as 'pa' in the header). The data rows are as follows:

roll_number	username	email	pa
1	sunath	sunath@gmail.com	sur
2	harish	harish@gmail.com	ha
3	hariharan	hariharn@gmail.com	ha
4	hariharan raja sudhan	hari@gmail.com	ha

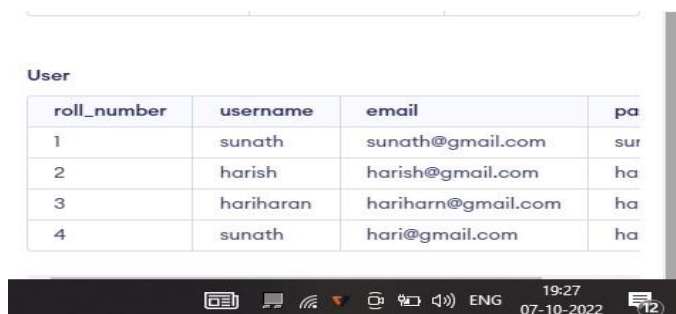

The bottom of the screenshot shows a mobile status bar with the time 19:25, date 07-10-2022, and various system icons.

UPDATE Statement:

UPDATE users

SET username = 'sunanth'

WHERE roll_number = '4'

The screenshot shows the same mobile application interface, but the table "User" now reflects the update. The data row for roll_number 4 has been updated:

roll_number	username	email	pa
1	sunath	sunath@gmail.com	sur
2	harish	harish@gmail.com	ha
3	hariharan	hariharn@gmail.com	ha
4	sunath	hari@gmail.com	ha

The bottom of the screenshot shows a mobile status bar with the time 19:27, date 07-10-2022, and various system icons.

DELETE Statemnet:

```
insert into user values(4,'aa','aaa@gmail.com','aasdfg2') ;
```

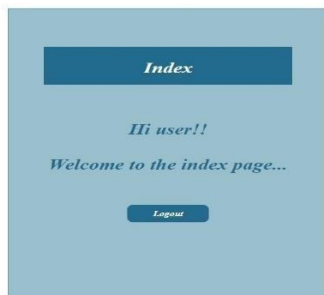

```
delete from user where roll_number='4'
```

roll_number	username	email	pa
1	sunath	sunath@gmail.com	sur
2	harish	harish@gmail.com	ha
3	hariharan	hariharan@gmail.com	ha

3.Connect python with db2

```
conn = ibm_db.connect("DATABASE=bludb;HOSTNAME=824dfd4d-99de-440d-9991-629c01b3832d.bs2io90l08kqb1od8lcg.databases.appdomain.cloud;PORT=30119;SECURITY=SSL;SSLServerCertificate=DigiCertGlobalRootCA.crt;UID=lvq43963;PWD=BsnsG112sBgIRhVN",'','')
```

4.create a flask app with registration page, login page and welcome page. by default load the registration page once the user enters all the fields store the data in database and navigate to login page authenticate user username and password. if the user is valid show the welcome page

```
from flask import Flask, render_template, request, redirect, url_for, session  
from flask_mysql import MySQL import MySQLdb.cursors
```

```

import reapp = Flask(__name__)      app.secret_key
= 'your secret key'  app.config['MYSQL_HOST'] =
'localhost'  app.config['MYSQL_USER'] = 'root'
app.config['MYSQL_PASSWORD'] = 'your password'
app.config['MYSQL_DB'] = 'geeklogin'      mysql =
MySQL(app)

@app.route('/')

@app.route('/login', methods =['GET', 'POST'])
